

Exhibit A

Editorial Update to the IPv6 Section in the NRPM

The text is historical. The flowchart is out of date.

Remove the following text from “6. IPv6”:

“[Editor's note: The IPv6 assignment and allocation policy document was adopted by the ARIN Board of Trustees on July 9, 2002. As part of the ARIN policy cataloging project of 2004, the IPv6 policy document was inserted into the ARIN Number Resource Policy Manual; the fact that it was once a stand alone document explains why the phrase "this document" occurs in this section.]

Status of this Memo

This document was developed through joint discussions among the APNIC, ARIN, and RIPE communities.

Abstract

This document defines registry policies for the assignment and allocation of globally-unique IPv6 addresses to ISPs and other organizations. This document obsoletes the "Provisional IPv6 assignment and allocation policy document."

This document was developed jointly by the communities of APNIC, ARIN, and RIPE.”

#####

Replace the flowchart in 6.2 with the following:
