

**Recommended Draft Policy ARIN-2014-4
Remove 4.2.5 Web Hosting Policy**

2014-4 – History

- Origin: ARIN-prop-196 (Jan 2014)
- AC Shepherds: John Springer, Andrew Dul
- AC accepted as Draft Policy in January 2014
- Presented at PPC at NANOG 60
- AC recommended adoption March 2014
- Draft Policy text
 - Online & in Discussion Guide (page 15)
 - https://www.arin.net/policy/proposals/2014_4.html

2014-4 – Staff Summary

- This proposal would remove existing policy NRPM 4.2.5 as it is “technology specific language” that is obsolete and not in sync with current network practices.

2014-4 – Staff Assessment

- If this policy were removed from NRPM, ARIN staff would still be able to require technical justification for web hosting based on the overall requirement to show efficient use as outlined in NRPM section 4.
- This proposal could be implemented as written.

Resource Impact: Minimal (3 months)

- Updated guidelines and internal procedures
- Staff training

2014-4 – Legal Assessment

- The policy does not create legal concerns.
