Questions

ARIN Advisory Council

ARIN Advisory Council

- Paul Emmons
- Leif Sawyer
- Kerri-Ann Richards
- Elford Parsons – not present
- Chris Woodfield
- Andrew Dul
- David Farmer
- Joseph Karam – not present
- Chris Tacit
- Alicia Trotman – not present, Video

Paul Emmons
Ninja-IX Corporation

I maintain the ORG-IDs and network records including the IRR records for both the IX operation and consulting clients within ARIN and other RIRs. This includes doing requests for IPv6, IPv4 waitlist and transfers, ASNs, Reserved IP Pool space and IPv6 transition (NPRM 4.10) address space.

I am engaged almost weekly with ARIN by doing changes via ARIN Online and templates.

Leif Sawyer
General Communication, Inc

- I've been working with IP networking since 1993, with areas of focus in IPv4 and IPv6 deployment strategy, network and security architecture, VOIP infrastructure, and network management automation.

- My current position is Enterprise Security Architect, encompassing skills from all of my previous areas of work. Additionally, I act as the lead IP addressing architect for my company, and sole ARIN representative, secondary assignments which I have held for over 10 years.

- I've held a position on the ARIN Advisory Council for the past three years, working on multiple policies that have helped multiple segments of the community.

Kerrie-Ann Richards
VFJ Coding Ltd

- I am a Director for Vision for Jamaica trading as VFJ Coding which introduces coding to primary school children. As a parent and entrepreneur, I want to make sure that policy perspectives are broadened to encompass the needs of developing nations (Caribbean).

- I have extensive international experience in Adult Education and Information Technology.

- I've studied at the University of Technology Jamaica as well as London Metropolitan University, possessing degrees in Marketing and Business IT.

- I am an experienced and certified business coach and readiness evaluator. I honed this skill in my present role at the Branson Centre of Entrepreneurship Caribbean as the Entrepreneur Development Manager.

- I have organized many workshops, Code Sprints, and Pitch Preparation sessions. I have been an IT Pitch Competition Judge since 2011, judging a number of international competitions.

- I have sat on the planning committees for several international conferences, such as International Federation for Information Processing (IFIP).

Elford Parsons
The Telecommunications Regulatory Commission -British Virgin Islands

SAN J°SE · 5-6 OCT 2017

- Chief Technology Officer at the Telecommunications Regulatory Commission of the Virgin Islands, advising the CEO on technology matters and in involved in shaping the telecommunications landscape of the British Virgin Islands.

- A 30 year veteran of the Telecommunications industry, the founder and owner of Tech It Easy (BVI) Ltd.

- A Rotarian for the past 10 years, has served as Vocational Services director and Director of Club Administration.

- Over the years served on various boards including:
  - The British Virgin Islands Electricity Corporation
  - The National Parks Trust of the Virgin Islands
  - The British Virgin Islands Ports Authority
  - The British Virgin Islands Government's Scholarship Advisory Board

Chris Woodfield
Salesforce.com, Inc.

- Principal Network Engineer, Salesforce - 2016-present
  Researches and designs leading-edge network architectures that focus on on the network edge, content delivery, and global traffic management.

- Senior Staff Network Engineer, Twitter - 2011-present
  Led Twitter's edge architecture and global traffic distribution strategies, with additional work on datacenter design and

- Senior Network Engineer - Yahoo! - 2010-2011

Andrew Dul
Crowdstrike

- A member of the Cloud Engineering team at Crowdstrike

- An independent networking & systems infrastructure consultant at 8 Continents Networks LLC

- Worked in various Internet networking positions since 1996
  - Network operations roles at the start-up network service provider Internap
  - Connexion by Boeing developing the global network that supported the first commercial inflight Internet service
  - Systems and Network Architect at Perkins Coie
  - Lead Engineer at Cascadeo

- Involved with ARIN since 1999, helping to contribute to the development of global IP number resource policy

- Holds a Bachelors of Science in Electrical Engineering from the University of California, Davis and a Masters in Business Administration with a Leadership Formation specialization from Seattle University, Albers School of Business and Economics.

- Formerly served on the ARIN Advisory Council from 2003-2005 and currently serves on the ARIN AC.

David Farmer
University of Minnesota

- Senior Network Design Engineer at the University of Minnesota. A member of the University's Office of Information Technology, servicing in varying networking roles, for the last 23 years.

- Lead engineer and peering coordinator for Northern Lights GigaPoP, a University operated network that provides ISP services for the University and other educational and government entities in Minnesota and several surrounding states.

- University of Minnesota's and Northern Lights GigaPOP's Technical Representative to Internet2, the Midwest Internet Cooperative Exchange (MICE), an Internet Exchange in Minneapolis, and the Big Ten Academic Alliance OmniPoP, an academic network connecting most of the Big Ten institutions, and many other similar activities both regionally and nationally.

Joseph Karam
Princeton University

- **Associate Director Networking and Monitoring Services, Princeton University – March 2015 - Present**

   Manage team prioritizing resources required to manage core network infrastructure/monitoring services. Manage projects and develop plans for improving all network infrastructure.

- **Senior Manager, Collaboration Services Group, Princeton University – February 2008 - May 2015**

   Manage team and prioritize resources required for the administration of central application services. Manage projects and design plans for the improvement of enterprise applications.

- **Director, Network and Telecommunications Services, Hamilton College – February 1999 - February 2008**
   Supervised employees, interns, and consultants who managed all telephone, network, and server administration functions.

   Designed, installed, and managed a 6,000 node Cisco Gigabit switched network and security systems.

- **Senior UNIX Systems Administrator, University of Rochester – 1995 - February 1999**

   Installed, maintained, and evaluated systems software, hardware, and applications for Solaris, SGI, and RedHat UNIX systems.

   Provided administrative, training, and technical support to 8,000 students, faculty, and staff for electronic mail, mailing lists, programming tools, and statistical applications.

Chris Tacit
Tacit Law

- I believe I have demonstrated the ability to assist the ARIN AC and broader community to reach consensus with contributions I have made to the ARIN policy development process during my current term on the AC.

- Electrical engineering, law and graduate business degrees. I am a licensed professional engineer (1983, Ontario), a member of the Law Societies of Upper Canada (Ontario) (1989), Alberta (2005), Nunavut (2009) and the Northwest Territories (2009), as well as a Canadian Trade-Mark Agent (1991).

- 36 years in the technology and communications fields, including over 28 years as a lawyer and consultant in these industries. A significant focus of my career has been the promotion of competition, dynamic change and growth in the communications, Internet and technology sectors.

- Over 23 years of experience in representing and working with not-for-profit organizations.

- Career highlights include engineering and management positions with two large telecommunications companies, a senior executive role in a publicly-traded company, a partner in a law firm, and founder of my own boutique law firm.

- Board member and corporate secretary of the Vancouver Internet Exchange, and am chair the board of a business corporation operating in the green transportation sector.

Alicia Trotman
The Telecommunications Unit, Government of Barbados
https://www.youtube.com/watch?v=xZAYO25dUX0

- TECHNICAL SUMMARY:
  Advanced expertise in Telecommunications regulations with focus on small island developing states
  Over a decade of expertise in providing ICT development, regulatory and monitoring policies; mechanisms to promote and maintain a competitive Telecommunications environment
  Expertise and trusted advisor in developing programs to promote cyber security awareness, with special interest and experience in youth programs
  Skilled in developing policies and best practices to increase an organization's security consciousness
  Exceptional results in learning new skills and managing various projects

- PROFESSIONAL EXPERIENCE: SECTOR: TELECOMMUNICATIONS BARBADOS
  Telecommunications Officer/ Telecommunications Unit(April 2007- Present)
  Radio Frequency Technician, Field Engineer/ Cingular Wireless (FEB 2005 – SEPT 2006)
  Telecommunications Officer/ Telecommunications Unit (Sept 2003- FEB 2005)

- EDUCATION:
  Master of Science Degree in Mobile Personal and Satellite Communication – University of Westminster (London)
  Bachelor of Science Degree in Electronics with Computer Science (with Honors) –University of The West Indies

- PROFESSIONAL AFFILIATIONS:
  Member of the Internet Society – Global, Barbados Chapter
  Executive committee member Barbados IGF 2017
  One of the founding members and Secretary of NOAH: No! to Online Abuse and Harassment

ARIN Board of Trustees

ARIN Board of Trustees

- Dan Alexander
- Nancy Carter
- Leslie Daigle
- Stephen Lee

Dan Alexander
Principal engineer for Comcast Cable LLC
Chair of ARIN Advisory Council
Chair of Geo Working Group for the Streaming Video Alliance

For fifteen years, I have been advocating a bottoms-up model of Internet governance and pushing for the deployment of IPv6. This work has been successful in helping one of the largest ISPs to become a leader in IPv6 deployment, and provided me with valuable experience with the Internet Registry system. As an engineer for a large corporation, and a previous small business owner, I have tried to maintain a pragmatic, no-nonsense approach to problem solving.

This approach has served me well as I have worked with other RIRs, attended ICANN meetings, and participated on the ITU's IPv6 Working Group. Having also been elected to the ARIN Advisory Council five times, including serving as the Chair of the AC for three years, I have been able to work across a wide range of issues from very local to global in scope. As I complete my work on the AC, I would like to continue to serve the community on the Board of Trustees.

Nancy Carter

CANARIE Inc. – Canada's National Research and Education Network

- Relevant skills for the Board of Trustees of ARIN include executive not-for-profit leadership, finance, program delivery, governance and legal. I have worked in the not for profit, research and education space for 20 years, with considerable international participation.

- Chief Financial Officer at CANARIE

- I currently serve on the Internet Society Canada Chapter Board, as the Treasurer.

- I earned a J.D., with a Law and Technology specialization, in 2012 from the University of Ottawa

- I would bring a wealth of Internet experience and knowledge of the digital infrastructure ecosystem to the Board of Trustees.

- I currently sit on, and in some cases chair, international committees that are working to evolve global network architecture policies and strategy.

Leslie Daigle
Principal, Thinking Cat Enterprises

- Working with Internet technologies for more than 25 years, and spent many of them involved with Internet-related not-for-profit organizations.

- The three key aspects of my experience that I think are pertinent to the ARIN Board position:

  + Extensive Internet institution leadership experience: I was an Internet Architecture Board member for 7 years, elected Chair of it for 5 of those years, leading the IETF through significant administrative changes. I am currently the Chair of the IETF Administrative Oversight Committee (IAOC, the IETF's board for financial and administrative functions).

  + Concrete experience with Internet-scale technology evolution: while I was the Internet Society's Chief Internet Technology Officer, my team developed the plan for and implemented the World IPv6 Day and Launch events that had a significant positive impact on IPv6 deployment. Currently, my own organization is advocating for progress on routing security technologies and practices that suit operator requirements and practical implementation.

  + Firm believer in the power of consensus and Internet community efforts with many examples from volunteer work done within the context of "day job" employment.

    For the last three years, I have been focused on consulting and developing innovative approaches to collaborative Internet development – TechArk, a "centre for the creative development of the Internet", with funded projects focusing on improving the Internet through collaborative industry activities.

Stephen Lee
ArkiTechs Inc.

- CEO and co-founder of ArkiTechs Inc., an IT provider headquartered in Florida with an office in Trinidad & Tobago, and operating across the whole Caribbean region. Responsible for solution design and business development in the areas of IP network infrastructure, application hosting, streaming media and VoIP solutions.

- As an Electrical Engineer, served in technical and executive positions at technology companies in Jamaica and the United States. Responsibilities included design, development, deployment and servicing of networks and software systems for multi-national organizations

- For over a decade, worked as an Advisor with the Caribbean Telecommunications Union (CTU) on infrastructure development and capacity building projects in the Caribbean region.

- A founding member of the Caribbean Network Operators Group (CaribNOG), a community of network operators dedicated to sharing technical information and experiences related to the management of ICT infrastructure in the Caribbean region.

- Collaborated with members of the ARIN team on outreach and education initiatives in the Caribbean, and with members of the community at public policy meetings. ARIN and CaribNOG have held two back-to-back meetings, and those have provided me with a unique opportunity to see ARIN's operations up close, and gain a greater appreciation of the work of the organization.

- Participate in regional and international fora, including meetings hosted by LACNIC, LACNOG, NANOG, ISOC, ICANN, CTU and CarPIF (the Caribbean Peering and Interconnection Forum).
