

AC Report

Summary of Activities

April 12th, 2006

Policy Process – Proposal Updates

- 2006-4: IPv6 Direct PI Assignments for End Sites
 - Abandoned in favor of editing the following.
- 2005-1: Provider-Independent IPv6 Assignments for End-sites
 - Previously revised and discussed on PPML.
 - Now, moved to last call with further amended text that reflects clearly defined prefixes with a specified reserve for growth.
- 2005-8: IPv6 Assignments and Utilization
 - Moved to last call.
- 2005-9: 4-Byte AS Number Policy Proposal
 - Edited for clarity (nomenclature). Moved to last call.

Policy Process – Proposal Updates

- 2006-1: Residential Customer Privacy
 - Based on split vote, open mic discussion...
 - Moved to revise and take back to PPML for further discussion.
- 2006-2: Micro-Allocations for Internal Infrastructure
 - Split vote, but clear interest in doing something here...
 - Moved to revise and take back to PPML for further discussion.
- 2006-3: Capturing Originations in Templates
 - Strong interest in doing something, just not the current version...
 - Moved to revise and take back to PPML for further discussion.
- 2006-5: IPv6 Micro-allocations for Anycast Services (Temporary)
 - No consensus; abandoned.
