What about CRISP?

Tim Christensen
ARIN

ARIN XVIII
ST. LOUIS
OCTOBER 11-13, 2006

IETF View

- **Most WG goals and milestones complete**
- **Remaining goals and milestones:**
  - Domain and IP address registration administration directory services required schema element specification drafts still need submission to IESG for review (Proposed Standards)
  - A Domain Availability (dchk) Registry Type for the Internet Registry Information Service (IRIS) needs submission to IESG for review (Proposed Standard)

RIR CRISP Development

- **RIPE NCC**
  - ➲ Prototype for number resources available since September 2005
  - ➲ Little to no feedback from community
- **LACNIC**
  - ➲ Prototype for domain names only
  - ➲ Didn't interact well with Verisign client implementation
  - ➲ Continue development for domain names
- **No development at AfriNIC, APNIC or ARIN**

Questions

- **Is the ARIN Community interested in CRISP?**

- **Should ARIN develop a prototype?**
