

Warm Up

Mark Kosters
CTO

What to do

- Register yourself in the ARIN wiki
- <http://www.getipv6.info>
- Follow the login/create account button on the top right to register
- Look at the content on the site
- http://www.getipv6.info/index.php/IPv6_at_ARIN_21
- Add your own

What to Do (cont)

- Read the handout – join the IPv6 specific networks
- Fix your various environments (eg enable ipv6 in firefox)
- Confirm you have joined
 - Look at your interfaces
 - ping the nameserver - ping6 2001:500:30:11::1
- Start surfing
- Try various ipv6 enabled sites
 - www.arin.net
 - www.getipv6.info
 - ipv6.google.com

What to Do (cont)

- Start using some of your other tools that you normally use
- Document what works and what is broken

Questions?
