5	3

- 1 in favor, 1 against
- Comments:
  - "I support this proposal… we can't have the free pool last forever, at least we can have an extra couple of months forewarning when it finally hits."
  - "It would be much fairer to reduce the size of IANA allocations from a full /8 to a smaller block size. In this way IANA can ensure that everyone runs out of IPv4 addresses at the same time."
