Draft Policy 2014-3

Remove 8.2 and 8.3 and 8.4 Minimum IPv4 Block Size Requirements

Problem Statement

All three transfer sections make the minimum block size allowed to be transferred a /24. In a post-exhaustion world, policy should allow and enable networks to move blocks around as they see fit, without arbitrary regulation of a minimum size.

Policy Statement

Remove all instances in 8.2, 8.3, and 8.4 which set a minimum transfer size of a /24.

Discussion

- Is the current language limiting block transfers to /24 appropriate? If yes, then we should abandon this draft.

- Should an organization be allowed to transfer existing blocks without limitations on size?

  e.g. /28 or /32? If yes, we should revise the draft.
  - Is there a minimum size smaller than /24 you would prefer?
